# Introdution

**Drill One** Trading & Contracting W.L.L was founded in Qatar in 2011. Our main lines of activities are specialized in commercial and Industrial cutting and core drilling jobs.

Our primary business is into supply of specialized Diamond Core Drills , Wire Saws, Diamond Blades especially designed for Reinforced concrete & Dry cutting manufactured exclusively from UK for Drill One.

On Contracting division we do core drilling, sawing concrete slabs, using electric and hydraulic powered sawing and drilling. The companies' service area has been confined to Middle East.

Buildings and structures, old and new, have a regular need for our services. Our customers include most general engineering, electrical, mechanical and plumbing contractors as well as many industrial accounts such as refineries

"Drill One is committed to managing health, safety and environmental (HS&E) matters."

General Manager, DrillOne T&C W.L.L

# Products

**Diamond Core Bits**

**Diamond Blades**

**Diamond Wires**

**Diamond Cup Wheel**

## Diamond Core Bits

Diamond core bits in sizes starting from 12mm to 800mm with Standard size in length of 450mm and we can customize Core bits with special lengths and sizes within a short period of time.

## Diamond Blades

Diamond blades in sizes starting from 350 mm to 1600 mm mainly used for cutting concrete, cutting reinforced concrete cutting, asphalt cutting, granite and marble cuttings.

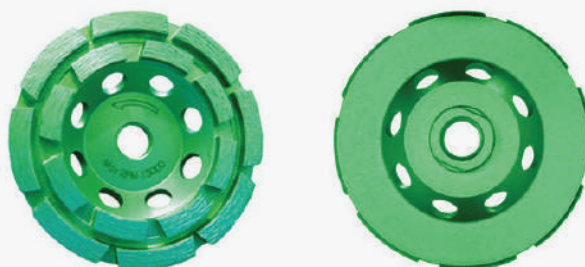

## Diamond Wires

Diamond wires mainly using for massive reinforced concrete structure cutting.

## Diamond Cup Wheel

Works for wet and dry applications delivers 15,000 RPM  
Ideal for leaving, removing coating and grinding concrete

Made in UK

# Services

## Concrete Diamond Core Drilling

### Concrete Diamond Core Drilling

Hole diameter from 12mm - 800mm for various concrete thickness, inclined coring, horizontal and vertical.

Diamond drilling is a quiet, non-percussive way of forming holes and openings.

The main type of diamond drilling used: wet drilling - This technique provides precise holes through all types of base materials such as mass concrete, reinforced concrete, brick masonry, and block work.

#### Field of application:

- Penetration up to 600mm diameter in reinforced concrete.
- Corner holes for wall-sawing.
- Large diameter coring e.g. manholes and foundations.
- Deep hole coring.
- Coring applications in highly reinforced concrete.
- Penetration for ducts, pipes and cables.
- Opening for ventilation.
- Stitch drilling for breaches.
- Holes for service entries.
- Wet drilling in concrete with drill stand.
- Wet drilling in concrete with hand-held.
- MEP application.
- Anchor fixing.
- Handrail fixing.
- Cladding fixing.
- Test cores.

# Services

## Reinforced Concrete Cutting - Wall Saw

## Pile Trimming

## Reinforced Concrete Cutting- Wall Saw

Reinforced concrete cutting upto 700mm thickness on wall and slab.

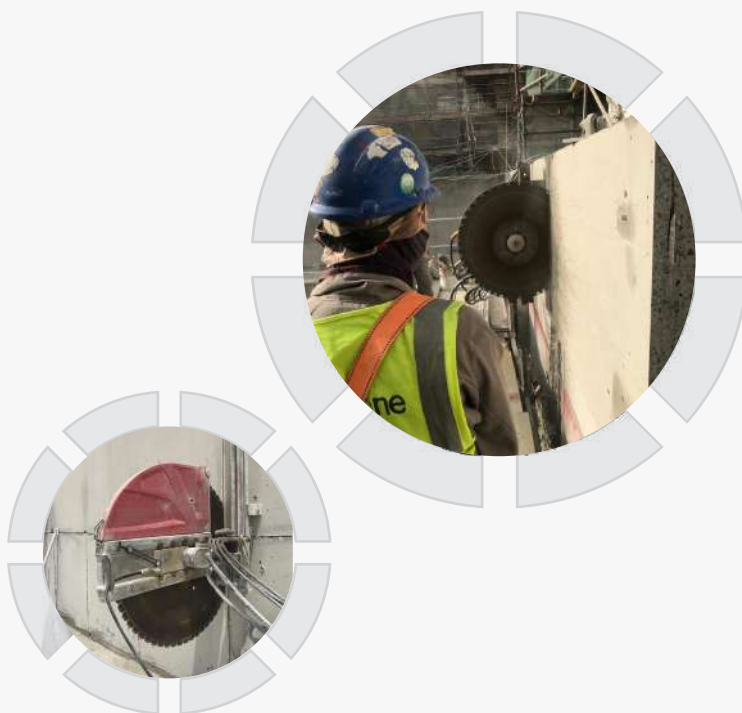

Opening for windows, doors, horizontal and vertical cutting.

Wall sawing provides an efficient solution for precision reinforced concrete or masonry wall cutting. Powered by electricity, our machines are ideal for cutting doorways, windows, reducing wall heights, and forming lift-shaft openings etc. Capable of cutting 750mm depth. Wall sawing leaves a smooth finish, clear cut with no overlap and no harm to the remaining structure. The saw blade cuts the concrete or masonry in small increments, in a series of passes until the required depth has been reached.

### Field of applications:

- Cutout and breaches for doors, windows, shafts and piles.
- Controlled demolition and renovation
- Wall sawing.

This operation is over-viewed and controlled remotely by an operator who has the controls about their person. They are able to maintain a safe working environment with dust free and less noise cutting.

## Pile Trimming

Breaking the pile with diameter from 300mm to 2000mm.

Pile trimming mainly used for remove surplus concrete from the piles. We can break the pile diameter from 300mm to 2000mm by using pneumatic jack hammers.

# Services

## Concrete Cutting - Floor Saw

## Concrete Cutting - Wire Saw

## Concrete Cutting - Floor Saw

Cutting slabs for expansion joints thickness up to 150mm.

Cutting asphalt.

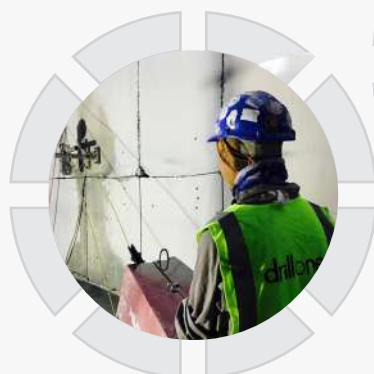

Also known as slab sawing, this method cuts asphalt and concrete surfaces such as floors, pavements, and electrical trenches. We use modern and tough machineries that can cut precise shapes and draw straight lines. We have complete cutting tools to address any projects; be it large or small. Our tools can draw concrete lines for design and pattern purposes. And according to your specific measurements, we make sure that your needs are met using our advanced equipment that are designed for precision cutting. In addition, we also have portable and hand-held tools to work on tight areas.

All of these and more are the services that we have in store for you. No matter what your construction needs are, our experience can guarantee to get the job done on time and on high quality. Our team has been on all types of concrete construction projects; thus, you can expect us to accommodate your needs and demands.

## Concrete Cutting - Wire Saw

Efficient way to remove large concrete structures.

Sawing with diamond wire is the most efficient way to remove large concrete structures such as foundations, bridges, Rock, Concrete pipes, and Steel pipes. Wire sawing can be done for any concrete thickness and any shape like horizontal, vertical and circular.

# Services

## Concrete Scanning

Concrete scanning, 3d imaging and power cable detection/utilities location services.

We use the latest technology in Ground Penetrating Radar Systems (GPRS). We provide concrete scanning, 3d imaging and power cable detection/utilities location services.

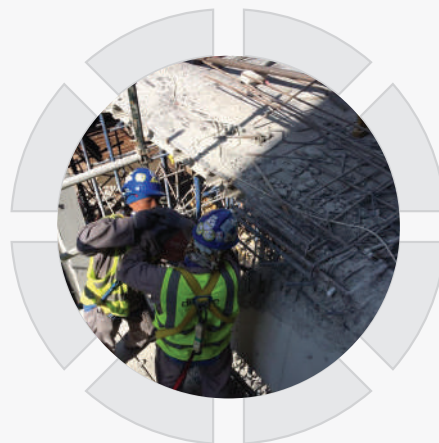

Our trained GPR service technicians are experienced in locating rebar, post tension cables, tanks, utilities, voids, pipe, conduit, and underground objects, by using the most advanced in ground penetrating radar and services location technology.

## Concrete Demolition

A reliable demolition expert

A reliable demolition expert not only brings an array of concrete demolition tools and methods. An expert also offers unparalleled experience, an ability to handle unforeseen circumstances with professionalism and a devotion to worksite safety.

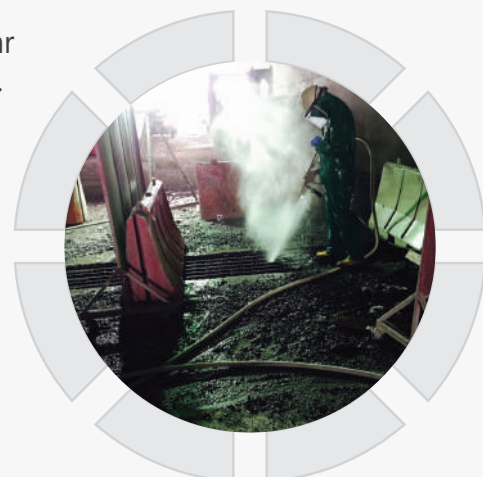

## Rebar and Chemical Anchor Fixing

Fixing all type of anchors as per standard specification

Our people are well trained enough with good expertise on any type of rebar or chemical anchor installation as per the client standards and requirements.

## Water Jet Cutting

Water jet cutting also known as hydro jet cutting. Works with ultra high pressure water 20,000 - 40,000 PSI. This tool can cut wide variety of material such as concrete, marble, steel etc by using a very high pressure of water with abrasives. An important benefit of the water jet is the ability to cut material without interfering with its inherent structure, As there is no heat affected zone.

# Safety Policy

**Drill One** is committed to managing health, safety and environmental (HS&E) matters as an integral part of our business. In particular, it is our policy to assure the HS&E integrity of our processes and facilities at all times and at all places.

We will comply with all applicable laws and regulations and will implement programs and procedures to assure compliance. Strict compliance with HS&E standards will be a key ingredient in the training, performance reviews and incentives of all employees. Where existing laws and regulations are not adequate to assure protection of human health, safety and the environment.

We will employ management systems and procedures specifically designed to prevent activities and/or conditions that pose a threat to human health, safety or the environment. We will minimize risk and protect our employees and the communities in which we operate by employing safe technologies and operating procedures, as well as being prepared for emergencies.

We will continuously seek opportunities to improve our adherence to these principles, and will periodically report progress to our contractors and consultants.

# Quality Policy

**Drill One** is committed to ensure accurate and timely services and to continuously meet or exceed the stated or implied expectations of our clients by:

1. Providing accurate, timely delivery of our services to our customers.
2. Managing our business by meeting the needs of our customers.
3. Personnel familiarize themselves with quality documentation and implement the policies and procedures in their work.
4. Maintaining a mode of continuous improvement by way of employing qualified personnel's addition of new equipment, enhancing skills of personnel through training/ refresher courses etc.
